

**ELECTRONIC SIGNATURES
AND DOCUMENT WORKFLOW
MANAGEMENT THAT MAKES
YOUR LIFE EASY**

ORGANIZATIONS ARE BECOMING DIGITAL BY DEPLOYING ELECTRONIC SIGNATURES AND WORKFLOW SOLUTIONS

organizations are cognizant that these solutions need to be secure and cloud based for the most efficient deployment.

eSigns meets these requirements and much more with a robust architecture and immense functionality that can cater to multiple industries and can cover all processes.

UNLIMITED TEMPLATES

Templates make it easier for organizations to define repetitive forms that require signatures and thus streamline processes by digitally signing and reusing templates thus reducing creation to signature time.

WORKFLOWS

Unlimited workflows can be defined by attaching signers in particular approval, signing or receiving order.

Workflows can be attached with re-usable templates thus reducing time to create a document to getting it approved and then signed.

BULK SIGNING AND SENDING

Documents that need to be signed in bulk such as letters, invoices etc can be signed in bulk by single or multiple signers and can be sent to one or many recipients.

EDITING FORMS

Documents can be filled in with information by signer before signing and an audit trail helps keep a track of all changes made for future reference.
